

WELL_{LIT}
WOODS

Warm light, made right.

Warm Light. Made Right.

Kinetic Light: Precision kerf cutting creates intricate curves and razor-thin gaps, allowing the light to follow you as you move around the room.

Hardware-Free Joinery: Our designs are adhesive-free, using specialized joinery that leverages wood's natural flexibility for a seamless, tool-free build.

Responsible Craft: We utilize FSC-certified Birch Plywood and UL-certified components to meet rigorous safety and sustainability standards.

The Personal Touch.

Choosing Well Lit Woods means entering a direct partnership with the maker. I've spent the last decade in high-precision manufacturing, and I founded this studio to apply that rigor to something more personal. Every lamp I create is an invitation to experience how thoughtful design and natural materials can transform a house into a home.

From the first quote to the final hand-delivery, I personally ensure every lamp meets my standard for safety and artistic integrity. No robots, no middle-men—just a dedicated designer committed to elevating your space.

Artisan wooden lighting.
Responsibly sourced.
Locally made.
